General Partner	PNTHR Funds, LLC
Investment Manager	STT Capital Advisors, LLC
Domicile	Delaware Limited Partnership
Fund Inception	Strategy operational April 17, 2026; first Limited Partner admission targeted Q3 2026
Strategy	Systematic Long/Short U.S. Equity
Offering Type	Regulation D, Rule 506(c) - Accredited Investors and Qualified Clients
Auditor	Spicer Jeffries, LLP (intended, upon admission of Limited Partners)
Fund Administrator	NAV Consulting, Inc. (engaged)
Legal Counsel	David S. Hunt, P.C. (engaged)
Prime Broker / Custodian	Interactive Brokers LLC
Bank	Axos Bank

II. Key Personnel

Name	Title	Experience
Scott McBrien	Managing Member, CIO & CCO	Decades of experience in equities, futures, and quantitative strategies; Series 7, 63, and 3 SEC/FINRA licenses; Head of Trading (Chicago); authored The Sigma Investor (Amazon #1 New Release); designed and built the entire PNTHR Signal System; featured in CNN, Business Insider, U.S. News & World Report, The Business Journals
Cindy Eagar	COO & CISO	Nearly 20 years in executive leadership and operations; helped scale Keap (Infusionsoft) from $10M to $100M in revenue; built all fund operational infrastructure, compliance framework, and investor data room; co-developed the PNTHR Signal System; featured in Business Insider, U.S. News & World Report, The Business Journals

III. Investment Strategy

Question	Answer
Strategy Description	Systematic long/short equity strategy using the proprietary PNTHR Signal System. Generates PNTHR Proprietary Buy Long (BL) and Sell Short (SS) signals based on sector-specific trend-filter dynamics, then ranks opportunities through a multi-dimensional scoring framework (Kill Score). Candidates pass through a direction-index gate (SPY 21-week EMA for S&P 500 members, QQQ 21-week EMA for Nasdaq-100-only members, MDY 21-week EMA for S&P MidCap 400 members), a sector ETF gate (sector-specific trend-filter periods, empirically optimized per sector; specific periods proprietary), a D2 sector-return gate, and an SS Crash Gate (dual confirmation of sustained bearish direction-index momentum and pronounced recent sector weakness; specific thresholds proprietary) for short entries. Positions are entered via a 5-lot pyramid structure (35% / 25% / 20% / 12% / 8%) with the PNTHR Proprietary Stop Loss System (PPSLS).
Investment Universe	PNTHR 679 - curated universe of approximately 679 high-liquidity U.S. equities drawn from the S&P 500, Nasdaq-100, Dow 30, and high-liquidity S&P MidCap 400 constituents, plus sector ETFs
Position Holding Period	Swing (typically 4-6 weeks; 20-day stale position exit if price fails to progress)
Long/Short Allocation	Dynamic based on regime and signal availability; structural long bias (top 10 BL + top 5 SS per week maximum). Per backtest: 2,460 BL / 163 SS trades = 93.8% / 6.2% by trade count
Use of Leverage	The Fund may employ leverage of up to 2:1 gross exposure.
Use of Derivatives	None. The Fund trades common equity and ETFs only.

IV. Risk Management

Question	Answer
Position Sizing	1.0% vitality cap per equity (0.5% per ETF); 10% per-ticker cap; NAV-scaled (vitality = NAV x 1.0%, tickerCap = NAV x 10%)
Stop Loss Methodology	PNTHR Proprietary Stop Loss System (PPSLS); stops never loosen; ratchet on pyramid lot fills (Lot 3 to breakeven, Lot 4 to Lot 2 fill, Lot 5 to Lot 3 fill)
Portfolio Heat Caps	10% gross long, 5% gross short, 15% total portfolio heat
Sector Concentration	No fixed sector concentration cap. The Fund may concentrate in a single sector when trend and macro conditions favor it. Sector allocation is governed by the sector ETF gate (each sector ETF must be above/below its per-sector optimized EMA for BL/SS respectively)
Automated Alerts	FEAST (RSI > 85, 50% reduction signal), Stale Hunt (20 trading days without progress)
Pre-Trade Assessment	100-point Analyze Score; minimum 55% required to proceed

V. Fees & Terms

Question	Answer
Management Fee	2.0% per annum on NAV, accrued monthly, paid quarterly in advance
Performance Allocation	20-30% quarterly, non-cumulative (Wagyu 20%, Porterhouse 25%, Filet 30%)
Hurdle Rate	US 2-Year Treasury yield, applied quarterly (annualized yield / 4)
High Water Mark	Yes - running maximum of adjusted NAV per unit, with Loss Carryforward Provision
Loyalty Discount	5% reduction in performance allocation after 36 consecutive months
Lock-Up Period	1 year (25% early withdrawal penalty if redeemed during lock-up)
Redemption	Quarterly with 60 days prior written notice; $25K minimum; $50K balance floor; 25% quarterly gate
Minimum Investment	Filet: $100,000; Porterhouse: $500,000-$999,999; Wagyu: $1,000,000+
Eligible Investors	Must be both Accredited Investors and Qualified Clients

VI. Operations & Technology

Question	Answer
Trading Platform	Interactive Brokers Trader Workstation (TWS) - automated sync via proprietary Python bridge
Data Infrastructure	MongoDB Atlas (encrypted at rest, auto-replicated), Vercel (frontend), Render (backend)
Market Data Provider	Financial Modeling Prep (FMP) API
Security Controls	2FA on all accounts, JWT authentication, role-based access control, encrypted data at rest
Reporting Frequency	Monthly performance letters; quarterly detailed reports
NAV Calculation	Real-time NAV from IBKR account sync; reconciled daily

VII. Regulatory & Compliance

Question	Answer
SEC Registration	Relying on private fund adviser exemption (sub-$150M AUM). Will file as Exempt Reporting Adviser (ERA) when required.
Form D	To be filed upon acceptance of first LP capital

Question	Answer
Compliance Program	Written compliance manual, personal trading policy with pre-clearance, code of ethics, AML/KYC procedures
Chief Compliance Officer	Scott McBrien, CIO & CCO
Chief Information Security Officer	Cindy Eagar, COO & CISO
Personal Trading Policy	Pre-clearance required; 7-day minimum holding period; no trading in Fund universe securities in personal accounts
Insurance	E&O; and D&O; coverage to be obtained prior to Outside Capital

VIII. Track Record

Question	Answer
Track Record Type	Hypothetical Systematic Backtest (June 2019 through April 2026; 82 months; 1,713 trading days). Fund has not yet traded non-affiliated Limited Partner capital.
Total Trades (Wagyu tier)	2,623 initiated (2,460 BL + 163 SS); 2,614 closed; 9 still open at backtest cutoff
Gross CAGR	+38.78% (Wagyu tier; post-transaction-costs, pre-fund-fees)
Gross Sharpe Ratio	2.59 (daily resolution, excess over US 3-month Treasury)
Gross Sortino Ratio	4.72 (daily resolution, MAR = 0)
Gross Profit Factor	11.22x
Gross Max Drawdown (daily NAV)	-8.51% (Wagyu tier, mark-to-market)
Net CAGR (after all fund fees)	Filet (100K): +25.81%; Porterhouse (500K): +27.73%; Wagyu (1M+): +29.48%
Net Sharpe Ratio	Filet: 1.64; Porterhouse: 1.81; Wagyu: 1.95
Net Sortino Ratio	Filet: 2.71; Porterhouse: 3.07; Wagyu: 3.39
Net Max Drawdown (daily NAV)	Filet: -9.99%; Porterhouse: -9.36%; Wagyu: -8.82%
Benchmark (S&P 500)	CAGR: +12.8%; Max Drawdown: -34.1%. Strategy alpha: Filet +13.0 pts; Porterhouse +14.9 pts; Wagyu +16.7 pts (annualized, net).
Data Integrity	Backtest internally validated: direction-index gate via historical SP500/NDX100 membership reconstruction (FMP events); SP400 membership via MDY ETF holdings proxy; sector ETF gate at sector-specific trend-filter periods (specific periods proprietary); quarterly non-cumulative fee engine per PPM sec. 4.1-4.3; mark-to-market daily-basis Max Drawdown computation. Not independently audited by a third-party accounting firm; Fund intends to engage Spicer Jeffries LLP as independent auditor upon Limited Partner admission.

Question	Answer
Full Detail	Refer to PNTHR Fund Intelligence Report v23 for complete per-class metrics, annual performance breakdowns, crisis alpha analysis, methodology, and anticipated due diligence questions.

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS. *No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. Hypothetical results are prepared with hindsight, do not involve financial risk, and cannot fully account for market impact or the psychological pressure of actual trading. Live performance typically delivers a portion of backtested results due to execution slippage, strategy decay, and capacity constraints; investors should expect realized results closer to top-tier industry averages (HFRI Equity Hedge long-run: 6-9% net CAGR, Sharpe 0.6-0.9) than to the backtest headline. This document contains hypothetical performance as defined in Rule 206(4)-1 under the Investment Advisers Act (the SEC Marketing Rule).*

This DDQ is provided for informational purposes only and does not constitute an offer to sell or a solicitation of an offer to buy any interest in the Fund. Any such offer will be made solely by the Private Placement Memorandum, Limited Partnership Agreement, and Subscription Agreement; in the event of conflict between this DDQ and those governing documents, the governing documents shall control. The Fund is offered in reliance on Rule 506(c) of Regulation D, relies on Section 3(c)(1) (not Section 3(c)(7)) of the Investment Company Act, and is limited to 100 beneficial owners. Past hypothetical performance is not indicative of future results. Investors may lose some or all of their capital.
