Business Continuity Plan

Carnivore Quant Fund, LP

v1.0 - April 2026

STT Capital Advisors, LLC

CONFIDENTIAL - FOR QUALIFIED INVESTOR USE ONLY
This document is the property of STT Capital Advisors, LLC
and may not be reproduced or distributed without prior written consent.

I. Purpose

This Business Continuity Plan (BCP) establishes the procedures STT Capital Advisors, LLC will follow to maintain critical business operations in the event of a significant disruption, including natural disasters, pandemics, technology failures, and key personnel incapacitation. The goal is to minimize disruption to Fund operations and protect investor capital at all times.

II. Key Personnel & Succession

Role	Primary	Backup	Responsibility
CIO / CCO	Scott McBrien	Cindy Eagar (liquidation authority)	Investment decisions, signal system management, trade execution, compliance oversight
COO / CISO	Cindy Eagar	Scott McBrien	Operations, information security, investor relations, fund administration

Key Person Contingency

In the event that Scott McBrien is incapacitated and unable to manage the portfolio:

- Cindy Eagar is authorized to execute the **Liquidation Protocol** - an orderly unwinding of all open positions using the Proprietary PNTHR Stop Loss System (PPSLC)
- All pending orders will be cancelled immediately
- No new positions will be opened
- Investors will be notified within 24 hours
- If incapacitation exceeds 30 days, the Fund will initiate an orderly wind-down as described in the Limited Partnership Agreement

III. Technology Infrastructure

Data Backup & Recovery

System	Provider	Backup Method	Recovery Time
Database	MongoDB Atlas	Auto-replicated across 3 nodes; continuous backup	< 1 hour
Application Code	GitHub	Full version history; all branches preserved	< 30 minutes
Frontend Hosting	Vercel	Auto-deployed from GitHub; CDN replicated globally	< 5 minutes

System	Provider	Backup Method	Recovery Time
Backend Hosting	Render	Auto-deployed from GitHub; container-based	< 15 minutes
Market Data	FMP API	Candle cache in MongoDB (12-week age cap)	Immediate (cached)

Critical Vendor Dependencies

Vendor	Function	Alternative / Mitigation
Interactive Brokers	Trade execution, custody, NAV sync	Positions can be managed directly via TWS or IBKR mobile in emergency
FMP API	Market data (price, EMA, RSI, volume)	Candle cache provides 12 weeks of historical data; alternative data providers available
MongoDB Atlas	All application data, signals, portfolio	Triple-replicated; point-in-time recovery; local backup capability
Vercel	Frontend hosting (React/Vite)	Can be redeployed to any static host (Netlify, AWS S3) within 1 hour
Render	Backend hosting (Node.js/Express)	Can be redeployed to any Node.js host (Railway, Fly.io, AWS) within 1 hour

IV. Remote Operations

STT Capital Advisors, LLC is a **fully remote-capable operation**. All critical systems are cloud-based and accessible from any location with internet connectivity. Both key personnel maintain:

- Laptop with all necessary software pre-configured
- Mobile access to IBKR TWS for emergency trade management
- 2FA-enabled access to all critical systems
- Encrypted communications (end-to-end) for sensitive discussions

V. Communication Plan

In the event of a significant disruption affecting Fund operations:

Stakeholder	Notification Method	Timeline
Limited Partners	Email and phone	Within 24 hours
Prime Broker (IBKR)	Platform notification + phone	Immediately
Legal Counsel	Phone + email	Within 24 hours
Regulators	As required by applicable regulation	Per regulatory requirement

VI. Cybersecurity

The Manager maintains the following security controls:

- **Two-Factor Authentication (2FA)** on all accounts (IBKR, MongoDB, GitHub, email)
- **Encryption at rest** for all database storage (MongoDB Atlas)
- **JWT-based authentication** with role-based access control for the PNTHR application
- **No shared passwords** - individual accounts for all systems
- **Regular security updates** applied to all hosting environments
- **API keys rotated** periodically and stored in environment variables (never in code)

VII. Testing & Review

This BCP will be reviewed and tested **annually** or upon any material change to the Manager's technology infrastructure, key personnel, or vendor relationships. Testing includes verification of backup recovery procedures, communication protocols, and emergency access to all critical systems.
